   - Glazing replacement projects
   - Glazing retrofit projects

5. Safety (14%)
   - Worker safety
   - Job site safety

*Percentages are approximate*

Test Site Policy

This is a closed-book examination. No reference materials may be used during the examination. All materials brought to the examination site must be left in an unmonitored area at your own risk.

Test Strategy

This is a multiple-choice examination with four choices per question. Examination questions are written to provide only one BEST answer. Some questions require mathematical computation. A calculator will be provided.

There is no penalty for guessing. If you are unsure about a particular question, it is better to try to answer the question than to leave the question blank.

Plenty of time is provided to answer all examination questions, so be sure to read each question and its four choices completely and carefully before selecting the BEST possible answer to the question.
Sample Questions

Below are three typical examination questions. The correct answer is underlined.

1. A lite of glass, which is 42” x 62”, has approximately how many square feet of glass?
   a. 2604
   b. 208
   c. 104
   d. 18

2. Which of the following is MOST important when considering using a heavy door in a storefront system?
   a. Lock system
   b. Door pull size
   c. Pivot hinges
   d. Door stops

3. When assembling an aluminum patio door frame, how should the frame be sealed?
   a. The supplier assembles and seals the frame.
   b. Seal around the frame after installation.
   c. Seal the sill corners and screw holes.
   d. Attach a nail-on flange at the sill to cover the floor base and the outside face of the sill.

*All questions are written and reviewed by licensed contractors who are actively working in the trade*
