   - Personnel safety
   - Public safety

*Percentages are approximate*

Test Site Policy

This is a closed-book examination. No reference materials may be used during the examination. All materials brought to the examination site must be left in an unmonitored area at your own risk.

Test Strategy

This is a multiple-choice examination with four choices per question. Examination questions are written to provide only one BEST answer. Some questions require mathematical computation. A calculator will be provided.

There is no penalty for guessing. If you are unsure about a particular question, it is better to try to answer the question than to leave the question blank.

Plenty of time is provided to answer all examination questions, so be sure to read each question and its four choices completely and carefully before selecting the BEST possible answer to the question.
Sample Questions

Below are three typical examination questions. The correct answer is underlined.

1. What type of wall fitting should a contractor use to install a wall-mounted water closet?
   a. A hubless closet ring
   b. An approved spud fitting
   c. An approved closet flange
   d. An approved carrier fitting

2. What is the total charge for four 8-hour days' use of a backhoe, if the cost for rental is $400 per day and operator cost is $30 per hour?
   a. $3,200
   b. $2,560
   c. $1,840
   d. $1,600

3. Temperature relief valves must have what transitional length before PEX is used?
   a. 15"
   b. 18"
   c. 24"
   d. 36"

*All questions are written and reviewed by licensed contractors who are actively working in the trade*
