 - Stone slab and countertop installation
 - Accessories
- 5. Safety (18%)**
 - Personnel safety
 - Job site safety

Percentages are approximate

Test Policy

This is a closed-book examination. No reference materials may be used during the examination.

Test Strategy

This is a multiple-choice examination with four choices per question. Examination questions are written to provide only one BEST answer. Some questions require mathematical computation. A calculator will be provided.

There is no penalty for guessing. If you are unsure about a particular question, it is better to try to answer the question than to leave the question blank.

Plenty of time is provided to answer all examination questions, so be sure to read each question and its four choices completely and carefully before selecting the BEST possible answer to the question.

Sample Questions

Below are three typical examination questions.
The correct answer is marked with an asterisk (*).

1. How many square feet of tile are needed for an area that measures 2-1/2" by 4" on a plan that is drawn to a 1/8" scale?
 - a. 10 sq. ft.
 - b. 160 sq. ft.
 - c. 576 sq. ft.
 - d. 640 sq. ft.*
2. Which of the following types of tile requires sealing before grouting?
 - a. Vitreous body
 - b. Semi-matte
 - c. Crackle-glazed*
 - d. Ceramic
3. What does a tile setter need to do to reduce tile waste on a job?
 - a. Use a level.
 - b. Use setting tools.
 - c. Use proper bonding agents.
 - d. Use alternative layout methods.*

All questions are written and reviewed by licensed contractors who are actively working in the trade
