5. Exterior Remodeling (13%)

- Roof Repairs
- Remodeling exterior walls
- Doors and windows

6. Safety (16%)

- Personnel safety
- Job site safety
- Demolition and material safety

Percentages are approximate

Test Policy

This is a closed-book examination. No reference materials may be used during the examination.

Test Strategy

This is a multiple-choice examination with four choices per question. Examination questions are written to provide only one BEST answer. Some questions require mathematical computation. A calculator will be provided.

There is no penalty for guessing. If you are unsure about a particular question, it is better to try to answer the question than to leave the question blank.

Plenty of time is provided to answer all examination questions, so be sure to read each question and its four choices completely and carefully before selecting the BEST possible answer to the question.

Sample Questions

Below are three typical examination questions.
The correct answer is marked with an asterisk (*).

1. According to the California Residential Code, what is the MINIMUM allowable width of a residential hallway?
 - a. 44 inches
 - b. 40 inches
 - c. 36 inches*
 - d. 32 inches
2. A contractor is removing acoustic tile from a vaulted ceiling. The scaffold rental is \$65 per day. He calculates a 6-day rental with a 15% markup. What would the equipment cost be for this part of the job?
 - a. \$448.50*
 - b. \$405.00
 - c. \$390.00
 - d. \$339.13
3. When should a steel nail plate be applied to a wood stud?
 - a. When a hole is within 1" of the edge*
 - b. When a hole is within 1-1/4" of the edge
 - c. When a hole is within 1-1/2" of the edge
 - d. When a hole is within 1-3/4" of the edge

All questions are written and reviewed by licensed contractors who are actively working in the trade
