- Excavation and trenching
- Fill and grading

3. Paving (30%)

- Roadways, driveways, and parking lots
- ADA requirements
- Specialty paving
- Demolition and pavement repair
- Related paving activities

4. Safety (21%)

- Job site safety
- Environmental impact
- Traffic control

Percentages are approximate

Test Policy

This is a closed-book examination. No reference materials may be used during the examination.

Test Strategy

This is a multiple-choice examination with four choices per question. Examination questions are written to provide only one BEST answer. Some questions require mathematical computation. A calculator will be provided.

There is no penalty for guessing. If you are unsure about a particular question, it is better to try to answer the question than to leave the question blank.

Plenty of time is provided to answer all examination questions, so be sure to read each question and its four choices completely and carefully before selecting the BEST possible answer to the question.

Sample Questions

Below are three typical examination questions.
The correct answer is marked with an asterisk (*).

1. An aggregate base weighing 1.5 tons per cubic yard will be laid 12" deep on a 1,000-foot road, 24' wide. How many tons of aggregate will be required?
 - a. 889 tons
 - b. 1,333 tons*
 - c. 1,999 tons
 - d. 3,999 tons
2. How should a contractor proceed when a concrete load has arrived on a job site and the material comes out of the chute in lumps?
 - a. Add water.
 - b. Add retardant.
 - c. Reject the load.*
 - d. Place it immediately.
3. What is the purpose of a leveling course?
 - a. To establish a base for the finish grade*
 - b. To establish a starting point
 - c. To establish the subbase
 - d. To connect two areas

All questions are written and reviewed by licensed contractors who are actively working in the trade
