   - Drilling/penetrating safes
   - Installing and repairing video systems

6. Safety (12%)
   - Protective gear
   - Power tools and equipment
   - Safely work in elevated areas

*Percentages are approximate*

Test Site Policy

This is a closed-book examination. No reference materials may be used during the examination. All materials brought to the examination site must be left in an unmonitored area at your own risk.

Test Strategy

This is a multiple-choice examination with four choices per question. Examination questions are written to provide only one BEST answer. Some questions require mathematical computation. A calculator will be provided.

There is no penalty for guessing. If you are unsure about a particular question, it is better to try to answer the question than to leave the question blank.

Plenty of time is provided to answer all examination questions, so be sure to read each question and its four choices completely and carefully before selecting the BEST possible answer to the question.
Sample Questions

Below are three typical examination questions. The correct answer is marked with an asterisk (*).

1. Where are automatic flush bolts used?
   a. In double bypass doors
   b. In single doors
   c. In inactive doors*
   d. In double-acting doors

2. Which pair of hardware finishes are the same?
   a. 605 and US5
   b. 606 and US3
   c. 613 and US10B*
   d. 626 and US26

3. When selecting a power supply for a job using four 0.75-amp electromagnetic locks, which is the BEST power supply?
   a. 0.75 amp
   b. 1.5 amps
   c. 2.0 amps
   d. 4.0 amps*

*All questions are written and reviewed by licensed contractors who are actively working in the trade*
