- Troubleshooting existing septic systems
- Removing or repairing existing septic systems
- Maintaining existing septic systems

5. Safety (27%)

- Employee training and safety
- Job site safety

Percentages are approximate

Test Site Policy

This is a closed-book examination. No reference materials may be used during the examination. All materials brought to the examination site must be left in an unmonitored area at your own risk.

Test Strategy

This is a multiple-choice examination with four choices per question. Examination questions are written to provide only one BEST answer. Some questions require mathematical computation. A calculator will be provided.

There is no penalty for guessing. If you are unsure about a particular question, it is better to try to answer the question than to leave the question blank.

Plenty of time is provided to answer all examination questions, so be sure to read each question and its four choices completely and carefully before selecting the BEST possible answer to the question.

Sample Questions

Below are three typical examination questions.
The correct answer is underlined.

1. Which public agency issues permits for vacuum trucks?
 - a. The California Department of Transportation
 - b. The Department of Building and Safety
 - c. The Regional Water Quality Control Board
 - d. The Department of Public Health

2. How many 4" x 4" blocks are needed to line a 20' seepage pit using 14 blocks per row?
 - a. 4,480 blocks
 - b. 1,040 blocks
 - c. 840 blocks
 - d. 320 blocks

3. How does clay soil affect the surface area of seepage pits?
 - a. The size of the pits will need to be smaller.
 - b. Imported soil might be used to install the pits.
 - c. The pits might need to be connected in series.
 - d. Deeper or more pits might need to be installed.

All questions are written and reviewed by licensed contractors who are actively working in the trade
